Mobile-Catch®
The Link of Mobile Device & Life

Both hands occupied but still want access to your smartphone or tablet? Two hands not enough to set up the perfect lighting and framing for your photo? Neck ache from always looking down at your phone?

Whether you are cycling, driving, grocery shopping, cooking or relaxing at home, Mobile-Catch® patented products give you hands free access to your digital devices, so you can get hands on with life...

Black Edition

Mobile-Catch® Black Edition is our most versatile portable mount; engineered with approximately the same grip range as a human hand, and a loading weight of up to 6kg. The ideal smartphone mount for use in the car to follow directions; in the supermarket to check your list; in the kitchen to read a recipe; or out and about anywhere to set up the perfect smartphone photography shots. Additional accessories can give Black Edition extendable reach or even transform this unique product into a super handy SLR camera mount to replace that bulky tripod.

Hawk Sport

Whether you're cycling to work, just out for fitness and fresh air, or a hardcore cyclist doing a tour of Europe; the lightweight and easily mounted Hawk Sport is the smartphone bike mount for you. Interlocking fingers clamp firmly onto any size bike frame, handle bars or seat post, without need for layers of packing. The 4x connection ensures a secure link even in unstable conditions and 360° rotation with no risk of accidental release. Hawk Sport is the all-round sports mount, with additional accessories to give even greater protection for extreme sporting activities. And when you're off-the field and into the office, or relaxing at home, this clamp can even be transformed for use as a tablet mount.

Hawk Action

On the water, on stage, on the road, flying through the air; Hawk Action allows you to mount a smartphone, or action cam, to record events while you keep both hands free. Super stable and secure, with rotation in 360°, this portable mount is perfect for setting up your shot anywhere, and can be quickly remounted to give you a quick change of angle. Additional accessories give Hawk Action extendable reach for greater versatility.

The Mobile-Catch® Concept

Humans have walked the earth for millions of years, they have learned to walk upright and to use both hands to interact with the world around them. Now in the 21st century we are regressing, we walk with heads down and one or even both hands fused to a smartphone at all times. The concept of the **Mobile-Catch®** patented mounting system was born from a desire to remedy this apparent step-backwards in human evolution.

It may be just a mounting system - but it's a revolutionary one - a system allowing you to mount your smartphone, tablet, action camera, SLR camera, and lighting accessories anywhere you need to; giving you all the benefits of modern technologies, whilst still retaining the use of our most fundamental tools - the human hands!

With lightweight design, interlocking fingers, and vice like grip power from a threaded screw, not the tension from a simple spring; the **Mobile-Catch®** design can mount to any surface, flat round or uneven. All **Mobile-Catch®** products are super portable; easily mounted and remounted; and once in position won't loosen over time.

Customize Mobile-Catch®

Want to create a customized design, product combination, packaging, or sell **Mobile-Catch®** products under your own brand? We can provide all these services and more, subject to certain terms and conditions.

Is your product Mobile-Catch® compatible?

A patented design with huge versatility, the **Mobile-Catch®** concept is available for licensing. Work with us to incorporate this unique mounting system in to your products. Evolve from traditional suction cups, spring mounts and C-clamps; benefit from our expert knowledge to achieve stability and versatility with lightweight design and ease of use.

In addition to the consumer electronics market, **Mobile-Catch®** has the versatility for expansion in to many other fields – security, medical, automobile, tourism, marketing and promotion, and countless others - is your product **Mobile-Catch®** compatible?
